Last year, according to IBISworld.com, US insurance brokerage and agencies brought in revenues of \$117 billion and employed 965,000 people. There were 381,116 businesses in this market, for an average of \$308,000 per business. The average wage paid to an insurance industry employee was \$55,736.

IBISworld writes that:

This industry is expecting smooth sailing after some fairly volatile patches in the recent past. Overall, the insurance sector has fundamentally changed since 2001. The old practice of incurring underwriting losses, offset by large investment gains, is a thing of the past. As underwriting performances have improved, risk has been priced appropriately. This has triggered soft market conditions; revenue volatility is expected to remain low and the state of primary insurance markets will continue to have a strong bearing on industry prospects.

Key players in the industry include Marsh and McLennan Companies, Inc, Aon Corporation, and Willis Group Holdings Limited While there are major players, most of the industry consists of small, independent insurance brokers and firms. Large firms often pay significant amounts for an independent broker to join them and bring their client base along.
